

MUHAMMAD AUSAF ARYADIPUTRA

INDONESIAN CHATGPT USER | AI PROMPTING & DIGITAL CONTENT

Temanggung, Jawa Tengah, Indonesia • 087898247581 • ausafaryaa@gmail.com

PROFESSIONAL SUMMARY

Native Indonesian speaker based in Indonesia and an active ChatGPT user with experience using generative AI for learning, research, writing, programming, problem-solving, and creative content development. Experienced in communicating with AI primarily in Bahasa Indonesia and creating structured prompts by providing context, objectives, requirements, and desired output formats.

Interested in AI prompting, generative AI, digital content, and AI-assisted workflows. Comfortable learning independently, following detailed instructions, reviewing AI-generated outputs, and refining prompts to achieve the intended result.

AI & CHATGPT EXPERIENCE

Independent ChatGPT User — Personal & Academic Projects

- Regularly use ChatGPT primarily in Bahasa Indonesia for learning, research, writing, programming, brainstorming, and problem-solving.
- Create prompts with specific context, objectives, constraints, and desired output formats.
- Iteratively refine prompts when the initial AI output does not meet the required result.
- Use ChatGPT to assist with HTML, CSS, JavaScript, website development, and technical troubleshooting.
- Use generative AI to develop video ideas, scripts, captions, creative concepts, and digital content.
- Use ChatGPT for academic activities including research planning, thesis development, documentation, presentations, and structured writing.
- Review AI-generated responses and provide additional context or corrections to improve accuracy and relevance.

SELECTED PROJECTS

AI-Assisted Web Development

- Used ChatGPT as a coding assistant for HTML, CSS, and JavaScript.
- Used AI to identify and troubleshoot website rendering and image-display issues while preserving the existing visual design.
- Tested and reviewed AI-generated solutions before applying them.

AI-Assisted Academic Research

- Used ChatGPT to support the development of an information-system thesis project.
- Developed structured academic content including research background, research questions, objectives, methodology, literature review, and presentation materials.
- Explored Vigenère Cipher and biometric authentication within a web-based cashier security system.

AI Content & Script Development

- Developed prompts for short-form video scripts, hooks, narration, captions, and content concepts.
- Experimented with prompt structures to improve clarity, storytelling, and audience relevance.

TECHNICAL & AI SKILLS

AI & Generative AI	ChatGPT • Prompt Engineering • AI-Assisted Research • AI-Assisted Writing • AI Content Generation • Prompt Refinement • AI Output Evaluation
Web Development	HTML • CSS • JavaScript • Basic Website Development • Website Debugging
Content	Script Writing • Content Ideation • AI-Assisted Content Creation • Social Media Content • Creative Prompting
Other	Technical Documentation • Academic Writing • Online Research • Problem Solving • Information Structuring

EDUCATION

MAN Kota Magelang — Social Sciences (IPS)

Magelang, Indonesia • Graduated 2023

LANGUAGES

Bahasa Indonesia: Native

English: Basic
